MEMORANDUM FOR: Director, National Photographic Interpretation Center

SUBJECT : Proposed Contract with [REDACTED]

25X1

1. This memorandum requests approval for the commitment of funds for a contract. The specific request is stated in Paragraph 3.

2. During the year, requests are and will be generated within NPIC for modifications to existing equipment and new special purpose devices. Many of these modifications and new devices are too small to warrant the time and expense of a formal procurement, yet they are too complex or time consuming to be produced in-house. In order to maintain a solid and quick response capability, NPIC needs to be ready with certain services contracts to answer these requests. In the field of mechanical design and fabrication, it is proposed that we contract with the [REDACTED] to provide these services. With its Washington Area location and its background in building photo interpretation equipment, the [REDACTED] is a logical choice to perform quick response mechanical services for NPIC.
